

## Dilly Bag

A dilly bag is a cloth draw string bag, preferably cotton because it breathes allowing your gear to stay dry without going mouldy!

The drawstring stops dust and bugs getting in and allows the bag to be hung up in the fresh air as well as stopping the gear inside from falling out!

The dilly bag is used to transport and store your camp eating gear.

Inside your dilly bag should be:

Plate, bowl, cup

Cutlery (Knife, Fork & Spoon)

Tea towel

All the contents should be made of strong material such as metal or melamine to avoid breakage and should be CLEARLY LABELLED!!!!

The easiest way to make a dilly bag is from a small pillowcase, cotton bag from the supermarket or tea towel with drawstring sewn in.
